

The City of Chanute has hired Midland GIS Solutions to survey and map the City's public utility systems. This generally consists of locating utility features with global positioning system (GPS) equipment. This work will be ongoing during the months of April through June of 2018. You may notice employees of Midland GIS Solutions working in your neighborhood. They will occasionally need access into and through private property. The City has easements to perform this type of work and Midland GIS will be as respectful and unobtrusive as possible while completing this project.

As with any major project, there will be some inconveniences at times, but no service will be interrupted while this project is taking place. If you have any questions or concerns you may contact Midland GIS Solutions at (660) 562-0050 or contact Larry Gates with Chanute at (620) 431-5275.

Thank you for your patience during this work.

Larry Gates
Utility Director, City of Chanute
